Professional objective

I want to work for research and technology development . My goal is to grow professionally as a developer,improve my knowledge and stimulate logic for problem solving.

Profile

Dedicated and enthusiastic developer, currently working with Web Development (.NET and Node.js), ERP and integrated systems for government entities. I am familiar with a variety of technologies and development solutions. Looking for opportunities to expand knowledge and work with my skills for team dynamism.Always prioritizing teamwork and motivated by continuous learning.

Professional Experience

- **Software Development Trainee - CEBI**

Stack: .NET, PL/SQL Oracle, Angular, Java(Android Studio)

I am currently a .NET Developer and Android at CEBI, which works with integrated administrative systems. I've learned, with the help of my work colleagues, to work independently, debugging and seeking the best solutions.

In the github link there are some code samples that were created by me. These services are already in the production environment and in use by their customers.

- **Full Stack Developer- PostSheet -<https://postsheet.com>**

Stack: TypeScript, EJS, PostgreSQL, , AWS, Node.JS , Heroku, Ngrok and other libraries (Stripe, Google Auth, pg, path, etc.)

Working on an american project to automate campaigns sent by email and/or SMS. I am the only developer working on the project. This project uses postgresql, TypeScript with node.js for the backend and EJS for the front-end, The last implementations in the project were sending data through .csv and .xls/xlsx, integration with Stripe portal, file storage through S3 Storage

This application is used by City University of New York and Stanford University

Technical Skills

- .NET / C #
- JavaScript, TypeScript
- SQL (Oracle Database PL/SQL)
- PostgreSQL
- Node.js
- HTML, CSS
- EJS, React, Angular
- Bitbucket, Git, Jenkins, Heroku
- Stimulsoft Reports

- Java (Android Studio)

Languages

- English: Fluent
- Spanish: Intermediate

Education

Bachelor's degree in Computer Science - FMU (in course)

Currently in the third semester.

Bachelor's degree in Mathematics - Universidade Cruzeiro do Sul (in course)

Currently in the first semester.

Courses

Technical Courses:

- Codes - Udemy
- SQL - Udemy
- Oracle Database - Udemy
- Creation of API - Udemy
- Programming POO in Java - Basic to Advanced - Udemy
- Android Programming - Udemy
- JavaScript - Udemy
- Angular - Udemy
- HTML/CSS

- .NET Framework

A Reference by Joe PostSheet - PostSheet CEO

LinkedIn: <https://www.linkedin.com/in/joe-postsheet-%F0%9F%9A%80-3365ba242/>

Henrique has been great to work with. Simply put he is extremely hard working, able to problem solve complex problems, thinks with the end user in mind, fantastic with communication in English.

Through our interactions he has been very studious, learning quickly on his own accord, and self-motivated to learn as much as he can. We have been able to release product improvements at a 40% faster rate than other engineers hired.

His code is clean and gets stuff done quickly. He has a fantastic eye to understand the end user experience and provides thoughtful input proactively. Henrique's English is great and pretty much fluent at this point.

I would recommend Henrique highly and think anyone who hires him will find someone who will be a great fit for many years to come!
